Cricket Team Management System

The Bangladesh Premier League (BPL) is a professional Twenty 20 cricket league in Bangladesh cricket history. The BPL is one of the three professional cricket leagues in Bangladesh. It is the 16th most attended premier league in the world. The league of BPL manages this vast organization with a database. The database usually contains many tournament T20, Test, ODI. Every match of the tournament has many coaches by the team by team. The coaches have phone no, agreement. Coach id, role, name. It has played many leagues contains all league moderate, team match, contact, league name, league format, league team. Every league has a board office like board name, contract no, joining, job. The board appointed a manager for the league. Manager has a manager id, name, phone, salary, address. The board office selected stadium. The stadium has stadium id, capacity, place, country, name. The board of the league appointed umpire. The umpire has umpire id, country, date of birth, age, name. The board the umpire discussing and fixed many matches like match id, date, result, toss. The board also appointed a doctor. The doctor observes the player and record player's condition. The doctor has doctor id, name, appoint, add, phone. The league participate many players like player name, capital no, name, skill, date of birth, age, role. The players management has many selectors. The selectors selected player. The selectors have selectors id, phone, name. Every league has on or more ticket counter which is managed by the manager. Ticket counter sells tickets. The database keeps some record of tickets like ticket number, chair, first class, ticket prices.

Normalization:

Appoint (Bid, Job, Joining, Bname, contactNo, Coid, Cname, crole, Agreement Time, Phone)

1NF: Phone, ContactNo Multivalued attributes

2NF: Bid, Job, Joining, Bname, contactNo, Coid

General Query

1.Display Coach ID, Coach name, Coach Agreement Time and Coach Phone number?

=>Select Coid,Cname,Agreement_time,Phone from Coach

2.Display Board Official ID,Board Name where Coach ID is 1003?

=> select Bid,Bname from Board_Official where Coid='1003'

3.Display the number of ODI,Test and T20 series Tournament id is between 5001 and 5004?

=>select ODI,Test,T20 from Tournament where Tid between '5001' and '5004'

4)Display Manager name, manager phone number, address and salary in descending order by salary?

=>select Mname,Phone,Address ,salary from Manager_league order by salary desc

5)Display Player name and Date of Birth who have the skill All rounder from age 25 to 26?

=>select Pname,DOB from Player where Skill like '%Batsman%' and Age between 28 and 30

View

1.Create a view and display the Coach name,Coach ID,Coach Role and Phone number where agreement time is less than 3 years.

=>

Create or replace view Coach_Details

as

```
select c.Coid , c.Cname, c.Crole, c.Phone from Coach c where  
c.Agreement_time <'3 years'  
select * from Coach_Details
```

Group Function

1.Display the total salary of the Manager

```
=>select sum(Salary) from Manager_League
```

2)Display the lowest and highest ticket price ?

```
=>select min(Tprice) ,max(Tprice) from Ticket
```

3)Display the number of League name in which there is at least an 'L'?

```
=>select count(Lname) from League where Lname like '%L%'
```

4)Display the maximum capacity where Stadium Id is greater than 7103?

```
=>select max(Capacity) from Stadium where CP_id>'7103'
```

5)Display the average ticket price where ticket firstClass ticket in between 550 to 980?

```
=>select avg(Tprice) from Ticket where FirstClass between 550 and 980
```

Single Row Function

1.Display all the information of the Manager in uppercase where salary>60000?

=>select Mid,UPPER(Mname) , Phone,UPPER(Address) from Manager_League where Salary>60000

2.Display all information about the Doctor whose name is 'osoa, altaf'

=>select * from Doctor where lower(Dname) ='osoa, altaf'

3.Display the Stadium name and the capacity concatenating like 'StadiumName has Capacity'

Select (ST_name || ' ' || 'has' || ' ' || capacity) from Stadium

4.Display the annual salary of the manager who lives in Ireland and also name the table annual salary

Select (salary*12)as Annual_Salary from Manager_Ticket where Address='Ireland'

5.display the country length, Date of birth ,age and concat the umpire name and id

Select (Uname || ' ' || U_ID), length(country) as Country_Length, DOB, Age from Umpire

Subquery

1.Display the manager name and salary for all managers who earn more than manager number 9005

Select Mname,salary from Manager_League where salary>(select Mid from Manager_League where Mid='9005')

2.Display the joining month and job of the Board officials who was joined after job number 2004

Select Job, Joining from Job1 where Joining >(select Joining from Job1 where J_id='2004')

3.Display the umpire name ,age ,date of birth for all umpires who lives in the same country whose umpire id is 4101

Select Uname,Age,DOB,U_id from Umpire where country in(select country from Umpire where u_id='4101')

4.Display the Stadium id ,capacity ,stadium name where the capacity is greater than equal to the stadium name DHS,OOP and Lord

select st_id, capacity , st_name from Stadium where capacity>=any(select capacity from Stadium where st_name in ('DHS','OOP','Lord'))

5. Display Mname, phone, salary, address of all managers who have salary less then those managers who have 'P' at first of their name.

Select mname, phone, salary, address from manager_league2 where salary <all (select salary from manager_league2 where mname like 'P%')

Sequence

create sequence seriall increment by 1 start with 1111 maxvalue 2100
nocycle

insert into
Stadium1(CP_id,S_country,Place)values(seriall.nextval,'Nepal','Nepal'
)

insert into
Stadium1(CP_id,S_country,Place)values(seriall.nextval,'Argentina','Ar
gentina')

select * from Stadium1 where place = ANY('Argentina','Argentina')

Joining

Equivalent Joint:

1.Display doctors id,dname,phone number along with managers name and phone number?

```
select d.did,d.dname,d.dphone,m.mname,m.phone from doctor d,  
manager_league2 m where d.did=m.did
```

☒ Autocommit Display 

```
select d.did,d.dname,d.dphone,m.mname,m.phone from doctor d, manager_league2 m where d.did=m.did
```
